Journal of Cleft Lip Palate and Craniofacial Anomalies

Cleft lip and cleft palate, also known as orofacial cleft, is a group of conditions that includes cleft lip (CL), cleft palate (CP), and both together (CLP). A cleft lip contains an opening in the upper lip that may extend into the nose. The opening may be on one side, both sides, or in the middle. A cleft palate is when the roof of the mouth contains an opening into the nose.

Cleft lip and cleft palate - Wikipedia

Cleft lip and cleft palate are birth defects that occur when a baby's lip or mouth do not form properly during pregnancy. Together, these birth defects commonly are called "orofacial clefts".

Facts about Cleft Lip and Cleft Palate | Birth Defects

17 Global registry and database on craniofacial anomalies may be reflecting operational differences in ascertainment or case definition, or "micro" ethnic situations such as geographical clusters.

Why do babies with clefts have problems with feeding? Babies with clefts have trouble with feeding because it changes how parts of the mouth are formed and how they work and fit together.. Cleft lip makes it hard for babies to make a good seal around the nipple.; Cleft palate makes it hard to create suction because the mouth cannot be closed off from the nose.
