Medical classification, or medical coding, is the process of transforming descriptions of medical diagnoses and procedures into universal medical code numbers. The diagnoses and procedures are usually taken from a variety of sources within the health care record, such as the transcription of the physician's notes, laboratory results, radiologic results, and other sources.

For all inpatient hospital subsequent care progress notes (99231, 99232, 99233), the highest documented two out of three levels for history, physical and MDM will determine the correct level of service. Compare this with the requirement for the highest three out of three on initial hospital care encounters. I'll state it again.
