### **Compiled by U Ko Lay - Buddhism**

A compiler is computer software that transforms computer code written in one programming language (the source language) into another programming language (the target language). Compilers are a type of translator that support digital devices, primarily computers. The name compiler is primarily used for programs that translate source code from a high-level programming language to a lower level ...

These Report Templates are really great as these come up with a pre-prepared format, covering all the needed points of a proper sales activity report- and you would simply need to enter the needed information there. When you use the template with you, you are never required to go through the hassle of compiling a whole activity report from the beginning. Moreover, you would be able to follow the ...

net.sf.jasperreports.allow.element.negative.width: A property that determines whether elements having negative width values are allowed. If this value is set to false, the report is verified not to contain elements with negative width values. This is useful when the report is meant to be exported to grid-based formats such as HTML, XLS or CSV, which might enter an infinite loop.

News (2013-05-21) I finally(!) got around to uploading the Matlab/Octave versions of the programs in the book, which Prof. Benson Muite (Univeristy of Michigan) kindly sent me over a year ago. I apologize for the delay; my only excuse is that my schedule became incredibly hectic over the last year. Now that things have settled down again, I should have some time to start working on a French ...
