From Digital Imaging to Computer Image Analysis of Fine Art 3 This method has been criticized on a number of grounds,[13] but recent theoretical and empirical results show that such criticisms may not be warranted.[26,10]

From Digital Imaging to Computer Image Analysis of Fine Art

An important problem in image analysis is the detection of a presence of an object in a scene. This problem can be solved by using a special type of an image segmentation technique in which an a priori knowledge about the detected object (a template) is used to identify its location in a given scene.
