Ball Bushing (Linear) Bearing " This type of bearing is used extensively to allow for the smooth motion of 3D printer and CNC router heads. Their purpose, unlike the other bearings here, is to restrict radial motion, while allowing smooth linear motion.

Recall: All bearings are measured clockwise, from north, and are written as 3 digits, eg 013 Å°. To find the bearing of B from A , draw a line from A to B, draw a north-line at A and measure the angle clockwise from

the north-line to your line.

Most bearing word problems involving trigonometry and angles can be reduced to finding relationships between angles and the measurements of the sides of a triangle. In this case, finding the right basic trigonometric functions to relate the angles and measurements are crucial for setting up and solving the problem correctly. Trigonometry of angles and sides can be used on a daily basis in the ...
